NATIONAL FORENSIC SCIENCES UNIVERSITY

8th International Conference on Communication and Computational Technologies

ICCCT 2026
February 13-14, 2026

National Forensic Sciences University Goa Campus, India is organizing the 8th International Conference on Communication and Computational Technologies (ICCCT 2026) in Hybrid Mode, scheduled to be held during February 13-14, 2026. The conference is technically sponsored by the Soft Computing Research Society (SCRS)

The after-conference proceedings of the ICCCT 2026 will be published in the SCOPUS Indexed Springer Book Series, 'Lecture Notes in Networks and Systems'.

TOPICS COVERED

Track 1 Intelligent System: Concepts & Algorithms
- Decision trees
- Support Vector Machine
- Artificial Neural Networks
- Deep Learning algorithms
- Reinforcement Learning
- Genetic algorithms
- Data Mining and machine learning
- Association rule mining
- Novel feature selection algorithms
- Statistical learning algorithms
- Clustering, classification, and summarization of Web data
- Data pre-processing and noise removal algorithms
- Swarm intelligence
- Bio-inspired algorithms
- Nature inspired algorithms
- Text mining
- Intelligent algorithms of large spatial data
- Information retrieval
- Data visualisation

Track 2. Informatics and Applications
- Image processing and applications
- Medical imaging
- Natural language processing
- Recommender Systems
- Surveillance models
- Time series analysis via deep learning or machine learning methods
- Pattern recognition
- Healthcare Informatics
- Agricultural Informatics and Communication
- Brain computer interface
- Computational Economics
- Sentiment analysis and opinion mining
- Question answering system
- e-governance, e-Commerce, e-business, e-Learning
- Knowledge Management
- Water management using machine learning
- Internet of things (IoT)
- IoT for healthcare and agriculture
- Novel machine learning models for Smart cities

Track 3. Communication
- Wireless and Wired Networks
- Multimedia Communications
- Optical networks
- Pervasive Computing
- Next-Generation Networking and Internet
- Optical Networks and Systems
- Networking & Applications
- Broadband Wireless Communication
- Cognitive Radio and Networks
- Resource Coordination and Management
- Quality of Service
- Queuing Network Models
- Ad Hoc and Sensor Networks
- Communication and Information Systems Security
- Satellite and Space Communications

Submission Deadline
November 14, 2025

Notification of Acceptance
December 14, 2025

Springer
PUBLICATION PARTNER

Lecture Notes in Networks and Systems
