

Recently, a fellowship program to support anti-doping research was announced by the National Anti-Doping Agency (NADA). It is the first-ever anti-doping research fellowship announced by NADA.

In this regard, it is a noteworthy accomplishment for National Forensic Sciences University (NFSU), that Mr. Ndikumana Etienne, a Ph.D. student working under Dr. Astha Pandey, Associate Professor and Head of the CoE-NDPS & NSTS, is selected for the anti-doping research fellowship. His Ph.D. topic is “Development and validation of an analytical method for simultaneous separation and quantification of opioids and their metabolites in urine and blood matrices”.
