

## Course on Crime Scene Management

### National Forensic Sciences University

LNJN NATIONAL INSTITUTE OF CRIMINOLOGY AND FORENSIC SCIENCE  
(NFSU Delhi Campus) Web: [nfsu.ac.in](http://nfsu.ac.in)

Level of Participants	Judges/Magistrates, Dy. SP/ACP and above, Prosecution Officials, Defence Personnel and SSO and above from CFSL/FSL
Duration	05days

### **About the Course**

Crime Scene Management is a specialized field within forensic science that focuses on coordinating and organizing the systematic approach to handling crime scenes. The primary objective is to ensure the preservation and collection of evidence in a manner that maintains its integrity and admissibility in legal proceedings. Crime scene managers oversee the initial response to a crime scene, directing the activities of first responders, and establishing protocols for securing and documenting the area. This involves assessing safety risks, implementing search patterns, and employing various documentation techniques, such as photography and sketching, to record the scene comprehensively. Through effective management, the chain of custody is maintained, guaranteeing the reliability of evidence throughout the investigative process.

Additionally, crime scene management extends beyond the physical aspects of a crime scene to encompass legal and ethical considerations. Professionals in this field must be well-versed in the laws governing evidence admissibility, ethical responsibilities in handling sensitive information, and collaboration with other criminal justice entities. By combining organizational skills, technical expertise, and legal knowledge, crime scene managers play a pivotal role in facilitating thorough investigations and ensuring that the criminal justice system operates with accuracy and integrity.

Keeping in view the requirements, National Forensic Sciences University proposes to organize the 3rd Course on Crime Scene Management.

### **Course Objectives**

1. To provide participants with a comprehensive overview of the crime scene management and collection, preservation of the physical, chemical and biological evidences.
  2. To offer a holistic approach to crime scene management, equipping participants with essential skills in evidence documentation, collection, and legal considerations for effective forensic investigation.
  3. To make the participants aware of the state-of-the-art forensic technologies, enhancing their ability to process crime scenes systematically and apply learned techniques to real-world scenarios.
  4. To introduce participants to gain a nuanced understanding of the legal landscape surrounding crime scene investigations, admissibility of evidence and ethical responsibilities within the criminal justice system.
