About the Course

Proper collection and preservation of evidentiary material from the place of occurrence, from the victim/survivor and the accused in Sexual Assault cases and their subsequent analysis by the forensic expert is vital for linking the accused with the crime which leads to successful prosecution and convicting the accused. This reassures the society at large that the state and its agencies are serious and capable of dispensing justice to the victim. Since, Sexual Assault cases involve high sensitivity, enhancing knowledge and skill has to be a continuous process for effective investigation, prosecution and justice delivery. With this goal, a three day training course has been designed to augment the knowledge and skill of the Police Officers, Medical Doctors, Forensic Scientists, Prosecutors and Judicial Officers.

Objectives:

1. To enhance the skill and capability of the investigators in proper collection of evidence material in Sexual Assault cases from the place of occurrence and handling the survivor in such cases as per prescribed guidelines.
2. Orientation of the Medical Doctors for using latest SOPs and Evidence Collection Kits, while examining Sexual Assault cases.
3. To update the Forensic Experts regarding use of latest techniques for analysis of evidentiary materials in Sexual Assault cases and preparation of reports using standardized format.
4. To generate awareness and sensitivity among the Prosecutors and Judicial and Police Officers for understanding the Medico Legal and Forensic Reports for appraisal during judicial proceedings.
