# 3<sup>rd</sup> Course on Behaviour Forensics and Crime Investigation

From 28 April to 2<sup>nd</sup> May, 2025  
(5 Days)

विद्यया अमृतं अश्नुते

## National Forensic Sciences University

Knowledge | Wisdom | Fulfilment

An Institution of National Importance

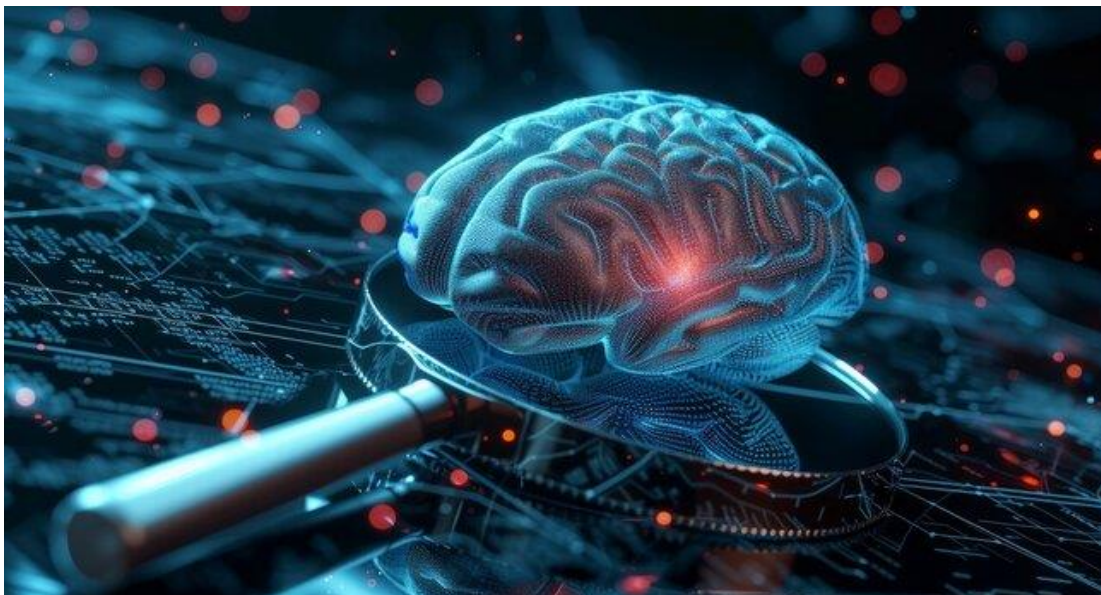

(Ministry of Home Affairs, Government of India)

## **ABOUTTHECOURSE**

Science has great role to play in understanding, explaining and dealing with the matters of crime and criminality. Behavioral science and the forensics are generally considered independent area of specialty having different approaches, principles, tools and techniques. But when it comes to the specialized knowledge and the expertise, there is growing interest that both the discipline can be integrated together.

The scientific theories and principles of behavioral science i.e. psychology applies to a greater extent on human mind and behavior in context of forensics that help in solving challenges encountered during crime investigation. The investigative psychology has been emerged as an area of specialty that covers domain area for training and research related to the matters of crime investigation.

The advance principles, tools, and techniques caters the needs and demands of the Law Enforcement Agencies during investigation of crime. It is evidenced that, at the crime scene, the behavioral perspective of an investigative psychology plays an important role. The experts examine the deviant behavioral cues while investigating the crime scene. Whatever the relevant traces associated with the criminal observed by the expert at crime scene contribute for the better understanding of the criminal during investigation.

Criminal investigation is not just a set of task skills. It is equally a set of thinking skills. To investigate a crime effectively, these skills need to be consciously understood and developed to the extent where the investigator deliberately engaged to work through the problem-solving approach.

Therefore, this training course is proposed to be conducted with the following objectives:

## **COURSE OBJECTIVES**

1. To make the participants aware about the facts and principles of behavioral forensics that are applied in investigation of crime.
2. To apprise them about the tools and techniques available pertaining to behavioral science that are utilized in criminal investigation.
3. To expose them practically with the uses and administration of tools and techniques applied in various forensic settings.
4. To familiarize them about the ethics applied during behavioral science practice in forensics.
